

QTM 131/QTM 231

STEREO GRAPHIC EQUALIZER

OPERATING GUIDE

Intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

Intended to alert the user of the presence of important operating and maintenance (servicing) instructions in the literature accompanying the product.

CAUTION: Risk of electrical shock – DO NOT OPEN!

CAUTION: To reduce the risk of electric shock, do not remove cover. No user serviceable parts inside. Refer servicing to qualified service personnel.

WARNING: To prevent electrical shock or fire hazard, do not expose this appliance to rain or moisture. Before using this appliance, read the operating guide for further warnings.

Este símbolo tiene el propósito de alertar al usuario de la presencia de "(voltaje) peligroso" que no tiene aislamiento dentro de la caja del producto que puede tener una magnitud suficiente como para constituir riesgo de corrientazo.

Este símbolo tiene el propósito de alertar al usuario de la presencia de instrucciones importantes sobre la operación y mantenimiento en la literatura que viene con el producto.

PRECAUCION: Riesgo de corrientazo – No abra.

PRECAUCION: Para disminuir el riesgo de corrientazo, no abra la cubierta. No hay piezas adentro que el usuario pueda reparar. Deje todo mantenimiento a los técnicos calificados.

ADVERTENCIA: Para evitar corrientazos o peligro de incendio, no deje expuesto a la lluvia o humedad este aparato. Antes de usar este aparato, lea más advertencias en la guía de operación.

Ce symbole est utilisé pour indiquer à l'utilisateur la présence à l'intérieur de ce produit de tension non-isolée dangereuse pouvant être d'intensité suffisante pour constituer un risque de choc électrique.

Ce symbole est utilisé pour indiquer à l'utilisateur qu'il ou qu'elle trouvera d'importantes instructions sur l'utilisation et l'entretien (service) de l'appareil dans la littérature accompagnant le produit.

ATTENTION: Risques de choc électrique – NE PAS OUVRIR!

ATTENTION: Afin de réduire le risque de choc électrique, ne pas enlever le couvercle. Il ne se trouve à l'intérieur aucune pièce pouvant être réparée par l'utilisateur. Confier l'entretien à un personnel qualifié.

AVERTISSEMENT: Afin de prévenir les risques de décharge électrique ou de feu, n'exposez pas cet appareil à la pluie ou à l'humidité. Avant d'utiliser cet appareil, lisez les avertissements supplémentaires situés dans le guide.

Dieses Symbol soll den Anwender vor unisolierten gefährlichen Spannungen innerhalb des Gehäuses warnen, die von Ausreichender Stärke sind, um einen elektrischen Schlag verursachen zu können.

Dieses Symbol soll den Benutzer auf wichtige Instruktionen in der Bedienungsanleitung aufmerksam machen, die Handhabung und Wartung des Produkts betreffen.

VORSICHT: Risiko – Elektrischer Schlag! Nicht öffnen!

VORSICHT: Um das Risiko eines elektrischen Schlages zu vermeiden, nicht die Abdeckung entfernen. Es befinden sich keine Teile darin, die vom Anwender repariert werden könnten. Reparaturen nur von qualifiziertem Fachpersonal durchführen lassen.

ACHTUNG: Um einen elektrischen Schlag oder Feuergefahr zu vermeiden, sollte dieses Gerät nicht dem Regen oder Feuchtigkeit ausgesetzt werden. Vor Inbetriebnahme unbedingt die Bedienungsanleitung lesen.

ENGLISH

OPERATION NOTE

This equalizer is designed to provide room equalization, feedback control, and system tone control. No amount of equalization will correct an acoustically bad room/mic/speaker arrangement or completely correct the response curve of a poor loudspeaker.

Always begin with all sliders in the "0" position and avoid excessively cutting large segments of the audio pass-band, which would limit the system's dynamic range.

Exercise caution when attempting to boost equalization below cutoff of the speaker system. Typical sound reinforcement enclosures are not designed for 20 Hz performance and transducer damage could result.

LOW CUT (1)

Provides high pass filtering at 40 Hz in the "in" position. Low frequency roll off is at 12 dB per octave.

LOW CUT LED (2)

With the low cut switch in the "in" position, this LED will illuminate indicating a low frequency roll off at 12 dB per octave at 40 Hz.

BYPASS (3)

In bypass mode (switch in), the input signal is routed directly to the output and is unaffected by all front panel controls except the low cut filter.

BYPASS LED (4)

This LED will illuminate when the bypass switch is in the "in" position, indicating that the EQ and gain controls are bypassed.

EQUALIZER SECTION (5)

31-bands of 1/3 octave filters. The filters are constant "Q" devices, located at ISO center frequencies. Effective equalization range is from 20 Hz to 20 kHz. Maximum cut or boost per frequency is 12 dB.

LED LEVEL METER (6)

This multicolored LED ladder indicates output level.

POWER SWITCH (7)

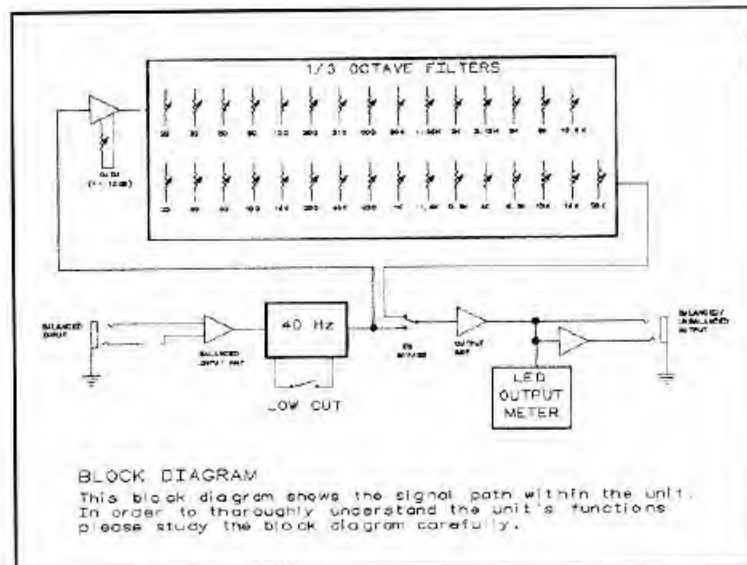

Used to turn AC mains power on or off.

INPUT (8)

A 1/4" Tip-Ring-Sleeve (stereo) jack provides balanced inputs when used with stereo (TRS) 1/4" plugs and 2-conductor shielded cables. When used with a mono 1/4" phone plug, the input is unbalanced.

OUTPUT (9)

A 1/4" Tip-Ring-Sleeve (stereo) jack provides balanced inputs when used with stereo (TRS) 1/4" plugs and 2-conductor shielded cables. When used with a mono 1/4" phone plug, the output is unbalanced.

SPECIFICATIONS

All specifications are typical unless otherwise noted.

0 dBV = 1 Volt

All specifications are referenced to nominal output level (0 dBV) unless otherwise stated.

All measurements are wide band 20 Hz to 20 kHz unless otherwise stated.

NOTE: All specifications measured at 1 V RMS input and unbalanced output. All sliders at mid position; all switches out unless otherwise noted.

Frequency Response:

±1 dB 20 Hz to 20 kHz

Distortion:

.003% 20 Hz to 20 kHz

Input Impedance:

Balanced 20 K ohms (equal impedances to ground)

Output Impedance:

100 ohms

Maximum Input Level:

+18 dBV (8 VRMS)

Maximum Output Level:

+18 dBV (8 VRMS)

Nominal Input Level:

0 dBV (1 VRMS)

Nominal Output Level:

0 dBV (1 VRMS)

Input Headroom:

Nominal 18 dB

Output Headroom:

18 dB

Output Noise:

EQ in bypass: -101 dBV

EQ in filter: -95 dBV

Filter Frequencies:

20, 25, 32, 40, 50, 63, 80, 100, 125, 160, 200, 250, 315, 400, 500, 630, 800, 1 K, 1.25 K, 1.6 K, 2 K, 2.5 K, 3.15K, 4 K, 5 K, 6.3 K, 8 K, 10 K, 12.5 K, 16 K, and 20 kHz

Filter Q:

4.77

Maximum Boost and Cut Filter:

±12 dB

Maximum Boost and Cut Gain:

(Wide Band Gain)

±12 dB

Low Cut Filter:

40 Hz

Power Requirement:

Domestic: 120 VAC / 60 Hz / 20 W

Export: 230 VAC / 50/60 Hz / 20 W

Due to our efforts for constant improvement, features and specifications listed herein are subject to change without notice.

ESPAÑOL

**Consulte los diagramas del panel
delantero en la sección de inglés de este manual.**

NOTA: Este ecualizador fue diseñado para proveer ecualización de ambiente, control de realimentación y control de tono del sistema. Ninguna cantidad de ecualización corregirá un arreglo de cuarto/micrófono/altavoz que esté acusticamente mal, ni tampoco corregirá completamente la curva de respuesta de un altavoz deficiente. Comience siempre con todos los controles deslizables en la posición "0" y evite cortar excesivamente largos segmentos de la banda de audio, cosa que limitaría la gama dinámica del sistema.

Prestar atención al intentar aumentar la igualación por debajo del punto de corte del sistema de altavoces. Los refuerzos típicos de las cajas de altavoces no están diseñados para una potencia de 20 Hz y podrían dañarse los transductores.

LOW CUT (Corte inferior) (1)

Cuando se encuentra oprimido proporciona un filtro de paso en los 40 Hz. La atenuación progresiva de las frecuencias bajas es de 12 dB por octava.

LOW CUT LED (LED de corte inferior) (2)

Al estar oprimido el conmutador de corte inferior, este diodo emisor de luz se encenderá indicando que está ocurriendo una atenuación progresiva de las bajas frecuencias de 12 dB por octava a los 40 Hz.

BYPASS (Derivación de paso) (3)

En el modo de derivación de paso (conmutador oprimido), la señal de entrada se dirige directamente a la salida y no se ve afectada por los controles del panel anterior, excepto por el filtro de corte inferior.

BYPASS LED (LED de la Derivación de paso) (4)

Este diodo emisor de luz se encenderá cuando el conmutador de derivación de paso esté oprimido, indicando que los controles de igualación y de ganancia se han pasado por alto.

EQUALIZER SECTION (Sección de igualación) (5)

31 bandas de filtros de 1/3 de octava. Los filtros son dispositivos "Q" constantes ubicados en las frecuencias centrales ISO. El rango de igualación efectivo es de 20 Hz a 20 kHz. El recorte o el refuerzo máximo por frecuencia es de 12 dB.

LED LEVEL METER (Medidor de nivel con LEDs) (6)

Este medidor progresivo de diodos emisores de luz de diferentes colores indica el nivel de salida.

POWER SWITCH (Interruptor de corriente) (7)

Se utiliza para encender o apagar la fuente principal de corriente alterna.

INPUT (Entrada) (8)

Este enchufe de 64 mm (1/4") con manga de punta de anillo (estéreo) proporciona una entrada equilibrada al usarse con conectores de 64 mm (1/4") estereofónicos (RTS) y cable blindado de dos alambres. Cuando se utiliza con un conector de 64 mm (1/4") monoaural para teléfono, la entrada no es equilibrada.

OUTPUT (Salida) (9)

Este enchufe de 1/4" (64 mm) con manga de punta de anillo (estéreo) se utiliza para la salida de la señal. Cuando se utiliza con un conector de 64 mm (1/4") monoaural para teléfono, la salida no es equilibrada.

FRANCAIS

Veillez vous référer au "front panel line art" situé dans la section en langue anglaise de ce manuel.

NOTE D'UTILISATION

Cet égalisateur est conçu pour corriger l'acoustique d'une pièce, contrôler les "feed-backs" et corriger la sonorité du système. Aucune égalisation ne peut arriver à corriger un arrangement pièce/microphone/haut-parleur mal agencé au point de vue acoustique. Commencez toujours avec les curseurs en position "0" vitez de couper excessivement de larges segments de la bande audio, ce qui limiterait le registre dynamique du système.

Faire preuve de prudence pour augmenter le niveau d'égalisation au dessous de la mise hors circuit du système d'enceintes. Les enceintes de renforcement acoustique n'étant normalement pas conçues pour une performance à 20 Hz, le transducteur risque d'être endommagé.

LOW CUT (Coupure des basses frequences) (1)

Permet d'obtenir un filtrage des hautes fréquences à 40 Hz en position marche («in»). La coupure des basses fréquences se produit à 12 dB par octave.

LOW CUT LED (Signal DEL de coupure des basses frequences) (2)

Lorsque l'interrupteur de coupure des basses fréquences est en position marche («in»), ce voyant DEL s'allume pour indiquer la coupure des basses fréquences à 12 dB par octave à 40 Hz.

BYPASS (Dérivation) (3)

En mode de dérivation (interrupteur en position marche), le signal d'entrée est directement acheminé vers la sortie sans être affecté par les commandes du panneau avant à l'exception du filtre de coupure des basses fréquences.

BYPASS LED (Signal DEL de dérivation) (4)

Ce voyant DEL s'allume quand l'interrupteur de dérivation est en position marche («in»), indiquant que les commandes de l'égaliseur et du gain sont déviées.

EQUALIZER SECTION (Partie égaliseur) (5)

31 bandes de filtres d'un tiers d'octave. Les filtres sont des dispositifs «Q» constants situés à des fréquences centrales ISO. L'amplitude d'égalisation effective s'étend de 20 Hz à 20 kHz. La coupure ou augmentation maximale par fréquence est 12 dB.

LED LEVEL METER (Compteur de niveau DEL) (6)

Cette échelle de signaux DEL multicolores indique le niveau de sortie.

POWER SWITCH (Interrupteur d'alimentation) (7)

Sert à mettre l'alimentation CA principale en circuit ("On") ou hors circuit ("Off").

INPUT (Entree) (8)

Une douille de raccordement annulaire (stéréo) de 63 mm (1/4 po.) permet d'obtenir des entrées équilibrées lorsqu'elle est utilisée avec des fiches stéréo (RTS) de 63 mm (1/4 po.) et des câbles blindés à deux conducteurs. Lorsqu'une fiche mono de 63 mm (1/4 po.) est utilisée, l'entrée est déséquilibrée.

OUTPUT (Sortie) (9)

Une douille de raccordement annulaire (stéréo) de 63 mm (1/4 po.) permet d'obtenir des sorties équilibrées lorsqu'elle est utilisée avec des fiches stéréo (RTS) de 63 mm (1/4 po.) et des câbles blindés à deux conducteurs. Lorsqu'une fiche téléphonique mono de 63 mm (1/4 po.) est utilisée, la sortie est déséquilibrée.

DEUTSCH

Siehe Diagramm der Frontplatte im englischen Teil des Handbuchs.

MERKE: Dieser Equalizer bietet Raum EQ, Feedback Kontrolle und Klangregelung des Systems. Er kann jedoch nicht akustisch ungünstige Räume, Mikrophone oder Lautsprecher korrigieren oder die Wiedergabe eines schwachen Lautsprechers völlig korrigieren. Immer mit allen Schieberegler in der "0" Position beginnen und große Sprünge im Frequenzbild vermeiden, da diese die Dynamik des Systems einschränken.

Eine Verstärkung der Entzerrung unterhalb der Frequenzgrenze des Lautsprechersystems sollte nur mit äußerster Vorsicht durchgeführt werden. Typische Schallverstärkungsgehäuse sind für einen 20 Hz-Betrieb nicht geeignet. Der Schwingungsumwandler könnte beschädigt werden.

LOW CUT (Tieftonverkürzung) (1)

Bietet eine Hochpaß-Filterung bei 40 Hz, wenn der Schalter in der "In-Position" steht. Der Niederfrequenz-Pegelabfall liegt bei 12 dB pro Oktave.

LOW CUT LED (LED für die tieftonverkürzung) (2)

Diese LED leuchtet auf, wenn der Schalter für die Tieftonverkürzung in der "In-Position" steht und zeigt an, daß der Niederfrequenz-Pegelabfall 12 dB pro Oktave bei 40 Hz beträgt.

BYPASS (Überbrückung) (3)

Im Überbrückungsmodus (Schalter ein) wird das Eingangssignal direkt zum Ausgang geleitet, ohne durch die Regler an der Vorderseite – mit Ausnahme des Filters für die Tieftonverkürzung – beeinflusst zu werden.

BYPASS LED (LED für die Überbrückung) (4)

Diese LED leuchtet auf, wenn der Schalter für den Überbrückungsmodus in der „In-Position“ steht und zeigt an, daß der Equalizer und die Verstärkungsregelung überbrückt werden.

EQUALIZER SECTION (Equalizer-bereich) (5)

31-Band 1/3-Oktaven-Filtersätze. Der Q-Faktor der Filter ist konstant und liegt im Bereich ISO-Mittelfrequenzen. Der effektive Entzerrungsbereich liegt zwischen 20 Hz und 20 kHz. Der maximale Cut oder Boost pro Frequenz liegt bei 12 dB.

LED LEVEL METER (Die LED-pegelanzeige) (6)

Die vielfarbige LED-Anzeige zeigt den Ausgabepegel an.

POWER SWITCH (7)

Hiermit wird das Gerät ein- und ausgeschaltet.

INPUT (Eingang) (8)

Die 6,2 mm Stereo-Eingangsbuchse (Ring-Tip-Sleeve) ist symmetrisch, wenn sie mit einem 6,2 mm Stereostecker und einem abgeschirmten zweiadrigen Kabel verbunden wird. Beim Gebrauch eines 6,2 mm Monosteckers ist der Eingang unsymmetrisch.

OUTPUT (Ausgang) (9)

Die 6,2 mm Stereo-Ausgangsbuchse (Ring-Tip-Sleeve) ist symmetrisch, wenn sie mit einem 6,2 mm Stereostecker und einem abgeschirmten zweiadrigen Kabel verbunden wird. Beim Gebrauch eines 6,2 mm Monosteckers ist der Ausgang unsymmetrisch.

THIS LIMITED WARRANTY VALID ONLY WHEN PURCHASED AND REGISTERED IN THE UNITED STATES OR CANADA. ALL EXPORTED PRODUCTS ARE SUBJECT TO WARRANTY AND SERVICES TO BE SPECIFIED AND PROVIDED BY THE AUTHORIZED DISTRIBUTOR FOR EACH COUNTRY.

Ces clauses de garantie ne sont valables qu'aux Etats-Unis et au Canada. Dans tous les autres pays, les clauses de garantie et de maintenance sont fixées par le distributeur national et assurées par lui selon la législation en vigueur.

Diese Garantie ist nur in den USA und Kanada gültig. Alle Export-Produkte sind der Garantie und dem Service des Importeurs des jeweiligen Landes unterworfen. Esta garantía es válida solamente cuando el producto es comprado en E.U. continentales o en Canada. Todos los productos que sean comprados en el extranjero, están sujetos a las garantías y servicio que cada distribuidor autorizado determine y ofrezca en los diferentes países.

PEAVEY ONE-YEAR LIMITED

WARRANTY/REMEDY

PEAVEY ELECTRONICS CORPORATION ("PEAVEY") warrants this product, EXCEPT for covers, footswitches, patchcords, tubes and meters, to be free from defects in material and workmanship for a period of one (1) year from date of purchase, PROVIDED, however, that this limited warranty is extended only to the original retail purchaser and is subject to the conditions, exclusions, and limitations hereinafter set forth:

PEAVEY 90-DAY LIMITED WARRANTY ON TUBES AND METERS

If this product contains tubes or meters, Peavey warrants the tubes or meters contained in the product to be free from defects in material and workmanship for a period of ninety (90) days from date of purchase; PROVIDED, however, that this limited warranty is extended only to the original retail purchaser and is also subject to the conditions, exclusions, and limitations hereinafter set forth.

CONDITIONS, EXCLUSIONS, AND LIMITATIONS OF LIMITED WARRANTIES

These limited warranties shall be void and of no effect, if:

- The first purchase of the product is for the purpose of resale, or
- The original retail purchase is not made from an AUTHORIZED PEAVEY DEALER; or
- The product has been damaged by accident or unreasonable use, neglect, improper service or maintenance, or other causes not arising out of defects in material or workmanship; or
- The serial number affixed to the product is altered, defaced, or removed.

In the event of a defect in material and/or workmanship covered by this limited warranty, Peavey will:

- In the case of tubes or meters, replace the defective component without charge.
- In other covered cases (i.e., cases involving anything other than covers, footswitches, patchcords, tubes or meters), repair the defect in material or workmanship or replace the product, at Peavey's option; and provided, however, that, in any case, all costs of shipping, if necessary, are paid by you, the purchaser.

THE WARRANTY REGISTRATION CARD SHOULD BE ACCURATELY COMPLETED AND MAILED TO AND RECEIVED BY PEAVEY WITHIN FOURTEEN (14) DAYS FROM THE DATE OF YOUR PURCHASE.

In order to obtain service under these warranties, you must:

- Bring the defective item to any PEAVEY AUTHORIZED DEALER or AUTHORIZED PEAVEY SERVICE CENTER and present therewith the ORIGINAL PROOF OF PURCHASE supplied to you by the AUTHORIZED PEAVEY DEALER in connection with your purchase from him of this product.
If the DEALER or SERVICE CENTER is unable to provide the necessary warranty service you will be directed to the nearest other PEAVEY AUTHORIZED DEALER or AUTHORIZED PEAVEY SERVICE CENTER which can provide such service.
- Ship the defective item, prepaid, to:

OR

PEAVEY ELECTRONICS CORPORATION
International Service Center
325 Hwy. 11 & 80 East
MERIDIAN, MS 39301

including therewith a complete, detailed description of the problem, together with a legible copy of the original PROOF OF PURCHASE and a complete return address. Upon Peavey's receipt of these items:

If the defect is remedial under these limited warranties and the other terms and conditions expressed herein have been complied with, Peavey will provide the necessary warranty service to repair or replace the product and will return it, FREIGHT COLLECT, to you, the purchaser.

Peavey's liability to the purchaser for damages from any cause whatsoever and regardless of the form of action, including negligence, is limited to the actual damages up to the greater of \$500.00 or an amount equal to the purchase price of the product that caused the damage or that is the subject of or is directly related to the cause of action. Such purchase price will be that in effect for the specific product when the cause of action arose. This limitation of liability will not apply to claims for personal injury or damage to real property or tangible personal property allegedly caused by Peavey's negligence. Peavey does not assume liability for personal injury or property damage arising out of or caused by a non-Peavey alteration or attachment, nor does Peavey assume any responsibility for damage to interconnected non-Peavey equipment that may result from the normal functioning and maintenance of the Peavey equipment.

UNDER NO CIRCUMSTANCES WILL PEAVEY BE LIABLE FOR ANY LOST PROFITS, LOST SAVINGS, ANY INCIDENTAL DAMAGES, OR ANY CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PRODUCT, EVEN IF PEAVEY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

THESE LIMITED WARRANTIES ARE IN LIEU OF ANY AND ALL WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR USE; PROVIDED, HOWEVER, THAT IF THE OTHER TERMS AND CONDITIONS NECESSARY TO THE EXISTENCE OF THE EXPRESSED, LIMITED WARRANTIES, AS HEREINABOVE STATED, HAVE BEEN COMPLIED WITH, IMPLIED WARRANTIES ARE NOT DISCLAIMED DURING THE APPLICABLE ONE-YEAR OR NINETY-DAY PERIOD FROM DATE OF PURCHASE OF THIS PRODUCT.

SOME STATES DO NOT ALLOW LIMITATION ON HOW LONG AN IMPLIED WARRANTY LASTS, OR THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU. THESE LIMITED WARRANTIES GIVE YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS WHICH MAY VARY FROM STATE TO STATE.

THESE LIMITED WARRANTIES ARE THE ONLY EXPRESSED WARRANTIES ON THIS PRODUCT, AND NO OTHER STATEMENT, REPRESENTATION, WARRANTY, OR AGREEMENT BY ANY PERSON SHALL BE VALID OR BINDING UPON PEAVEY.

In the event of any modification or disclaimer of expressed or implied warranties, or any limitation of remedies, contained herein conflicts with applicable law, then such modification, disclaimer or limitation, as the case may be, shall be deemed to be modified to the extent necessary to comply with such law.

Your remedies for breach of these warranties are limited to those remedies provided herein and Peavey Electronics Corporation gives this limited warranty only with respect to equipment purchased in the United States of America.

INSTRUCTIONS — WARRANTY REGISTRATION CARD

1. Mail the completed WARRANTY REGISTRATION CARD to:

PEAVEY ELECTRONICS CORPORATION
POST OFFICE BOX 2898
MERIDIAN, MISSISSIPPI 39302-2898

- a. Keep the PROOF OF PURCHASE. In the event warranty service is required during the warranty period, you will need this document. There will be no identification card issued by Peavey Electronics Corporation.
2. IMPORTANCE OF WARRANTY REGISTRATION CARDS AND NOTIFICATION OF CHANGES OF ADDRESSES:
 - a. Completion and mailing of WARRANTY REGISTRATION CARDS — Should notification become necessary for any condition that may require correction, the REGISTRATION CARD will help ensure that you are contacted and properly notified.
 - b. Notice of address changes — If you move from the address shown on the WARRANTY REGISTRATION CARD, you should notify Peavey of the change of address so as to facilitate your receipt of any bulletins or other forms of notification which may become necessary in connection with any condition that may require dissemination of information or correction.
 3. You may contact Peavey directly by telephoning (601) 483-5365.

IMPORTANT SAFETY INSTRUCTIONS

WARNING: When using electric products, basic cautions should always be followed, including the following.

1. Read all safety and operating instructions before using this product.
2. All safety and operating instructions should be retained for future reference.
3. Obey all cautions in the operating instructions and on the back of the unit.
4. All operating instructions should be followed.
5. This product should not be used near water, i.e., a bathtub, sink, swimming pool, wet basement, etc.
6. This product should be located so that its position does not interfere with its proper ventilation. It should not be placed flat against a wall or placed in a built-in enclosure that will impede the flow of cooling air.
7. This product should not be placed near a source of heat such as a stove, radiator, or another heat producing amplifier.
8. Connect only to a power supply of the type marked on the unit adjacent to the power supply cord.
9. Never break off the ground pin on the power supply cord. For more information on grounding, write for our free booklet "Shock Hazard and Grounding."
10. Power supply cords should always be handled carefully. Never walk or place equipment on power supply cords. Periodically check cords for cuts or signs of stress, especially at the plug and the point where the cord exits the unit.
11. The power supply cord should be unplugged when the unit is to be unused for long periods of time.
12. If this product is to be mounted in an equipment rack, rear support should be provided.
13. Metal parts can be cleaned with a damp rag. The vinyl covering used on some units can be cleaned with a damp rag or an ammonia-based household cleaner if necessary. Disconnect unit from power supply before cleaning.
14. Care should be taken so that objects do not fall and liquids are not spilled into the unit through the ventilation holes or any other openings.
15. This unit should be checked by a qualified service technician if:
 - a. The power supply cord or plug has been damaged.
 - b. Anything has fallen or been spilled into the unit.
 - c. The unit does not operate correctly.
 - d. The unit has been dropped or the enclosure damaged.
16. The user should not attempt to service this equipment. All service work should be done by a qualified service technician.
17. This product should be used only with a cart or stand that is recommended by Peavey Electronics.
18. Exposure to extremely high noise levels may cause a permanent hearing loss. Individuals vary considerably in susceptibility to noise induced hearing loss, but nearly everyone will lose some hearing if exposed to sufficiently intense noise for a sufficient time. The U.S. Government's Occupational Safety and Health Administration (OSHA) has specified the following permissible noise level exposures.

Duration Per Day In Hours	Sound Level dBA, Slow Response
8	90
6	92
4	95
3	97
2	100
1 1/2	102
1	105
1/2	110
1/4 or less	115

According to OSHA, any exposure in excess of the above permissible limits could result in some hearing loss.

Ear plugs or protectors in the ear canals or over the ears must be worn when operating this amplification system in order to prevent a permanent hearing loss if exposure is in excess of the limits as set forth above. To ensure against potentially dangerous exposure to high sound pressure levels, it is recommended that all persons exposed to equipment capable of producing high sound pressure levels such as this amplification system be protected by hearing protectors while this unit is in operation.
